

## ALQUIENVAS

### EXAMPLE

Alquienvas group was founded in 1995, counting with more than 1000 products made from 100% recycled plastic, the company has one of the widest catalogue of products.

Some of the applications are: Urban furniture, public playgrounds, children's playgrounds, road signs, acoustic protection, boardwalks, horticulture and landscape agriculture, stables, tree protection, fences, hydraulic engineering, industry, construction, etc.

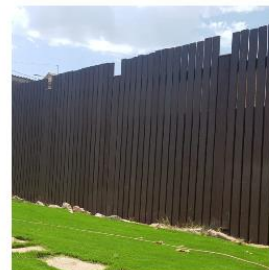

Plastic material is recovered from selected urban waste and it includes PEHD, PELD, PP and PS. The company also offers storage, transportation, distribution, assembly, maintenance, environmental awareness campaigns, waste management control and financing.

The company offers modern collection systems with electronic tags to improve the collection system. Then they process the material collected and transform it in their products. Another aspect that sets the company apart has to do with all the certifications they hold, such as: Der Blaue Engel, DIN EN 131, DIN EN 71/3, Reach, ISO 50001, ISO 14001 and Eucertplast.
